Minneapolis, Minnesota 55413

Dear Mr. Hoffman:

This will confirm and follow-up our telephone conversation of June 2, 1986. You have eight underground storage tanks (UST) at your facility for which you have substantially completed UST notification forms. You are having the tanks tightness tested using the Petrotite system and expect results of those tests within weeks. Rather than submit your forms now and resubmit new forms in several weeks showing the change in status for Item 16 on the form, "Date of Last Tank Test," I gave verbal permission to submit only once after results of the tank testing are in. If you have any questions, please contact this office.

Sincerely,

Thomas P. Clark
